

A J Engineering services Ltd

Carbon Reduction Plan

Supplier name: **AJ Engineering Services Ltd**

Publication date: 21st May 2025

Commitment to achieving Net Zero

AJ Engineering Services Ltd is committed to achieving Net Zero emissions by 2050.

Baseline Emissions Footprint

Baseline emissions are a record of the greenhouse gases that have been produced in the past and were produced prior to the introduction of any strategies to reduce emissions. Baseline emissions are the reference point against which emissions reduction can be measured.

Baseline Year: 2025	
Additional Details relating to the Baseline Emissions calculations.	
AJ Engineering Services Ltd has not previously assessed or reported emissions in accordance with PPN 06/21. The 2025 reporting period has therefore been used as the baseline year. The baseline covers UK operations only and includes Scope 1, Scope 2 and the required subset of Scope 3 emissions.	
Baseline year emissions: 2025	
EMISSIONS	TOTAL (tCO₂e)
Scope 1:	7.89
Scope 2:	0
Scope 3: (only mandatory reporting categories included)	29.53

A J Engineering services Ltd

Total Emissions	37.42
-----------------	-------

Current Emissions Reporting

Reporting Year: 2025	
EMISSIONS	TOTAL (tCO ₂ e)
Scope 1:	7.89
Scope 2:	0
Scope 3: (only mandatory reporting categories included)	29.53
Total Emissions	37.42

Notes:

Scope 2 - Purchased electricity is supplied under a renewable electricity tariff. Scope 2 emissions have therefore been reported as zero using the GHG Protocol market-based approach

Scope 3 - Emissions include the mandatory PPN 06/21 categories: business travel, employee commuting, waste generated in operations, upstream transportation and distribution, and downstream transportation and distribution.

Emissions reduction targets

In order to continue our progress to achieving Net Zero, we have adopted the following carbon reduction targets.

We project that carbon emissions will decrease to 24 tCO₂e by 2033. This is a reduction of 35% against the 2025 baseline.

Targets can be seen in the graph below:

Carbon Reduction Projects

No formal carbon reduction projects or environmental management initiatives had been implemented prior to the 2025 baseline reporting year.

In the future, AJ Engineering Services Ltd intends to implement a number of measures to further reduce operational carbon emissions, including:

- Installation of LED lighting throughout office and production areas.
- Installation of lighting controls and motion sensors.
- Improved energy management controls, including thermostat and timer optimisation.
- Investigation into the feasibility of solar photovoltaic (PV) systems.
- Installation of electric vehicle charging infrastructure.
- Continued procurement of renewable electricity supplies where available.
- Gradual transition of company vehicles towards lower-emission or electric alternatives.
- Reduction in unnecessary business travel through increased use of Teams and Zoom meetings.

Declaration and Sign Off

This Carbon Reduction Plan has been completed in accordance with PPN 06/21 and associated guidance and reporting standards for Carbon Reduction Plans.

Emissions have been reported and recorded, as far as reasonably practicable, in accordance with the GHG Reporting Protocol Corporate Standard and using the appropriate UK Government greenhouse gas conversion factors for company reporting.

Scope 1 and Scope 2 emissions have been reported in accordance with SECR requirements. The required subset of Scope 3 emissions has also been reported in accordance with the published reporting standard for Carbon Reduction Plans and the Corporate Value Chain (Scope 3) Standard.

Where complete activity data was unavailable, reasonable estimates and assumptions have been applied using available operational information and recognised conversion factor methodologies.

This Carbon Reduction Plan has been reviewed and approved by the board of directors of AJ Engineering Services Ltd.

Signed on behalf of AJ Engineering Services Ltd:
